

Phases of the Moon

Rotating Foldable

on the

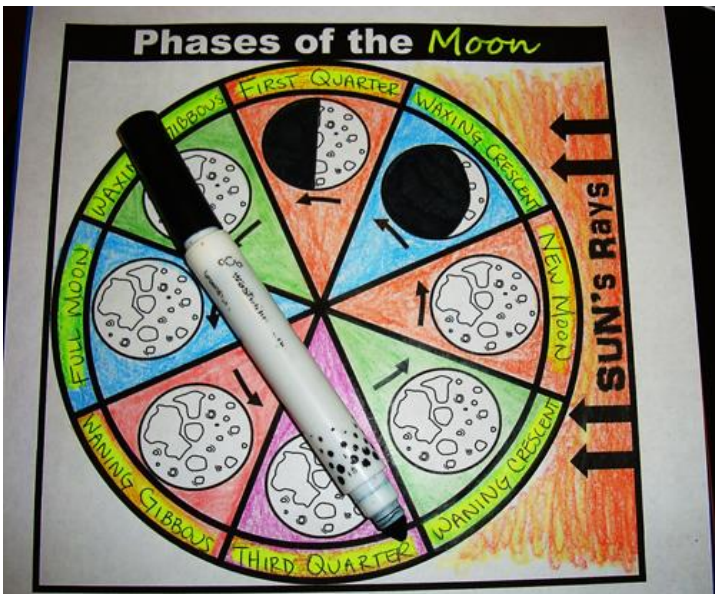

Phases of the Moon

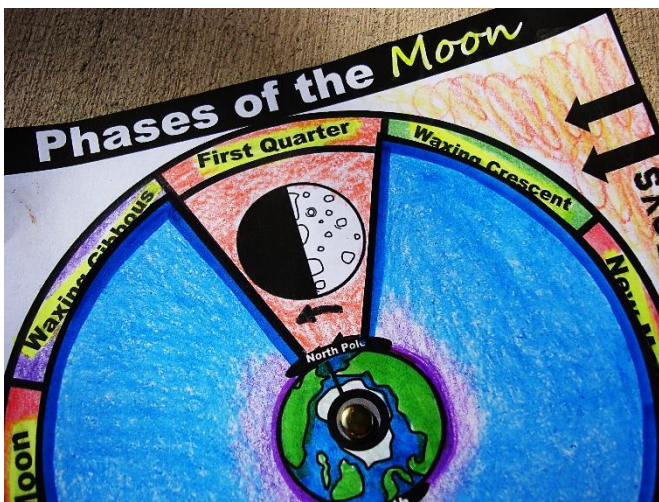

Few Notes

The bottom page comes in different versions (on page 5-8) so you can differentiate instruction.

For Example

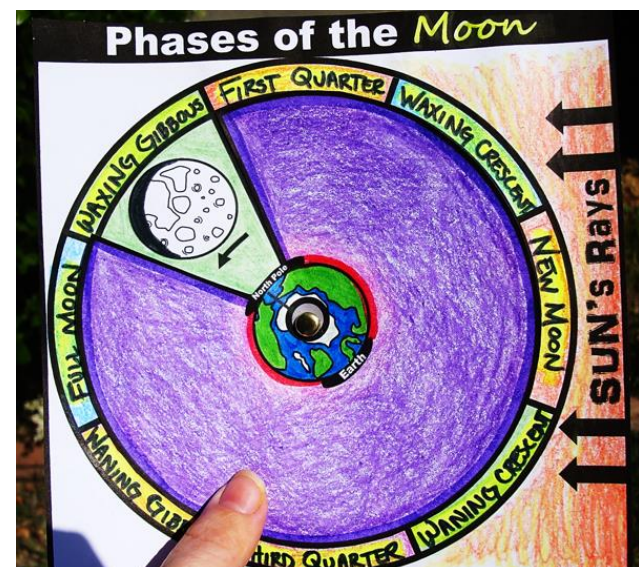

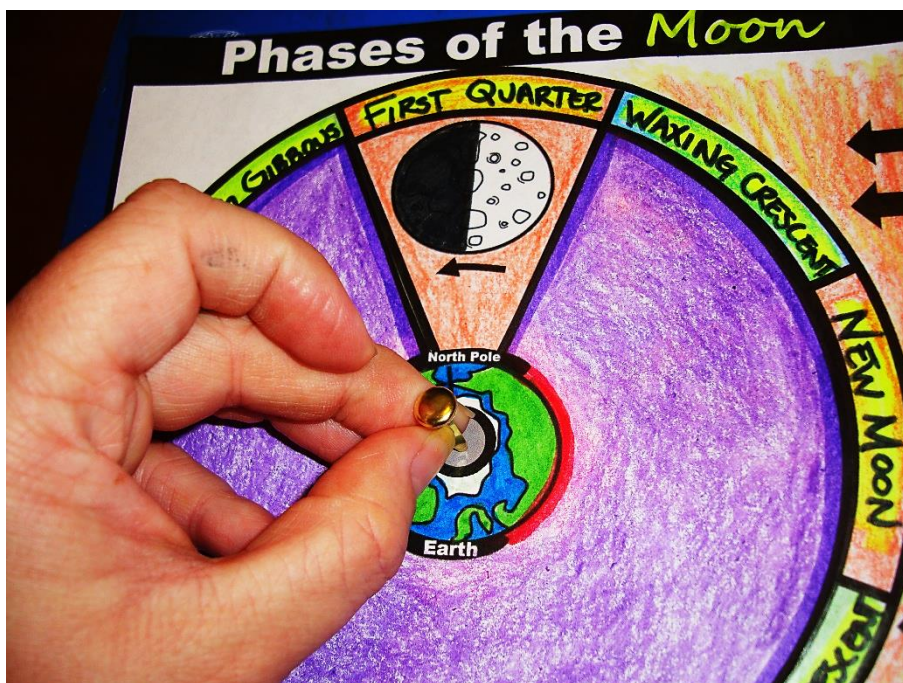

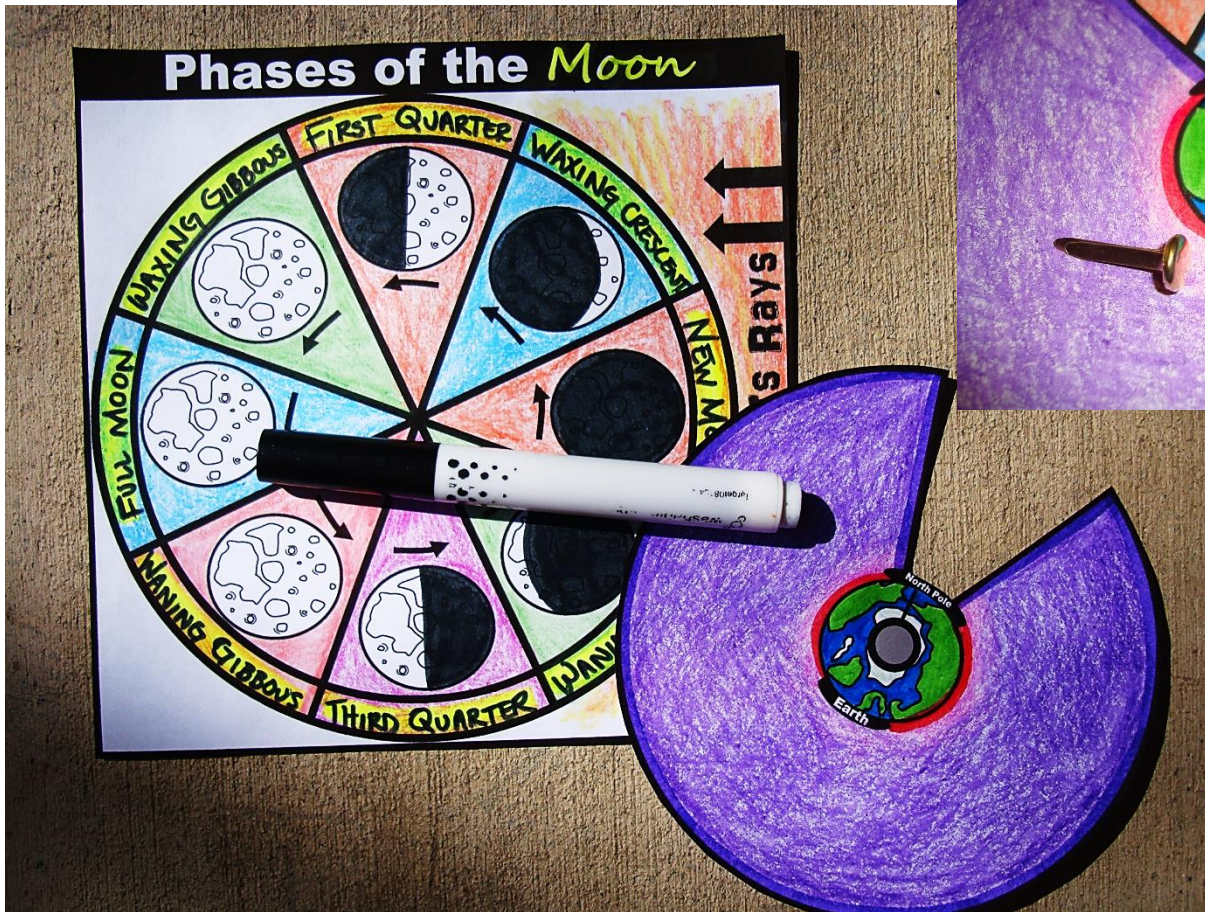

page 6 - requires students to use a black marker to color in the phases of the moon and identify them

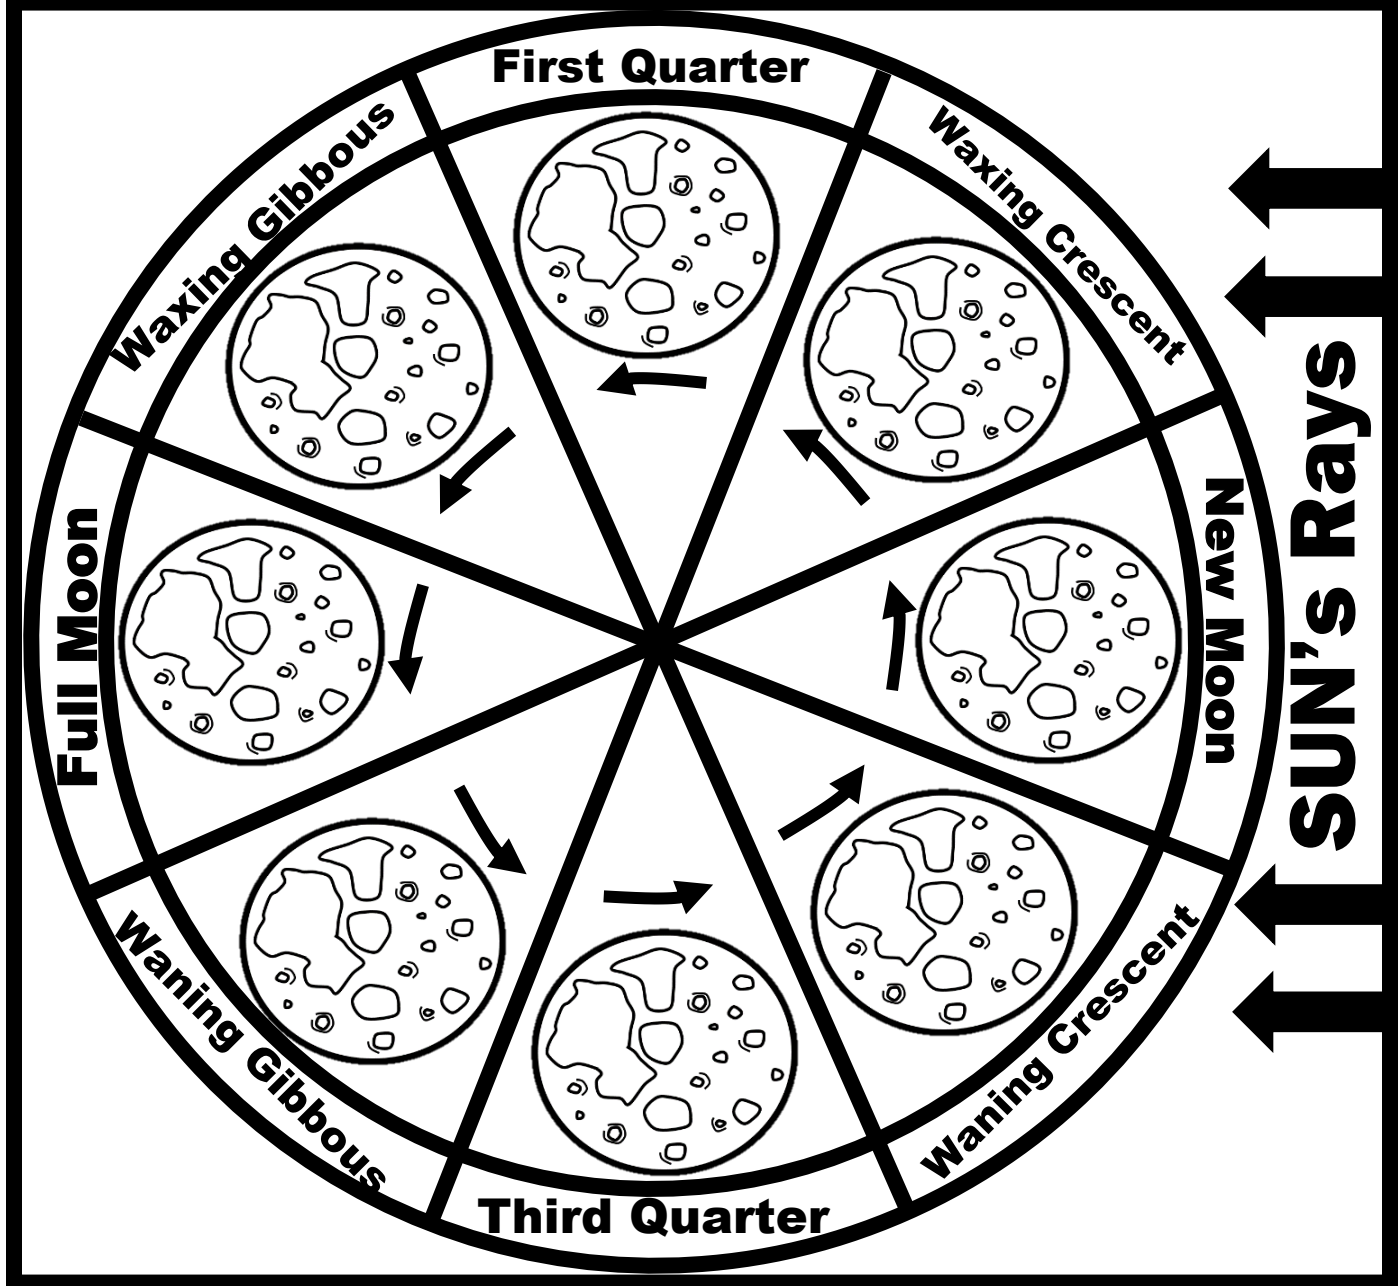

page 8 - has all the answers already filled in (great to use for review or as a graphic organizer for a struggling student)

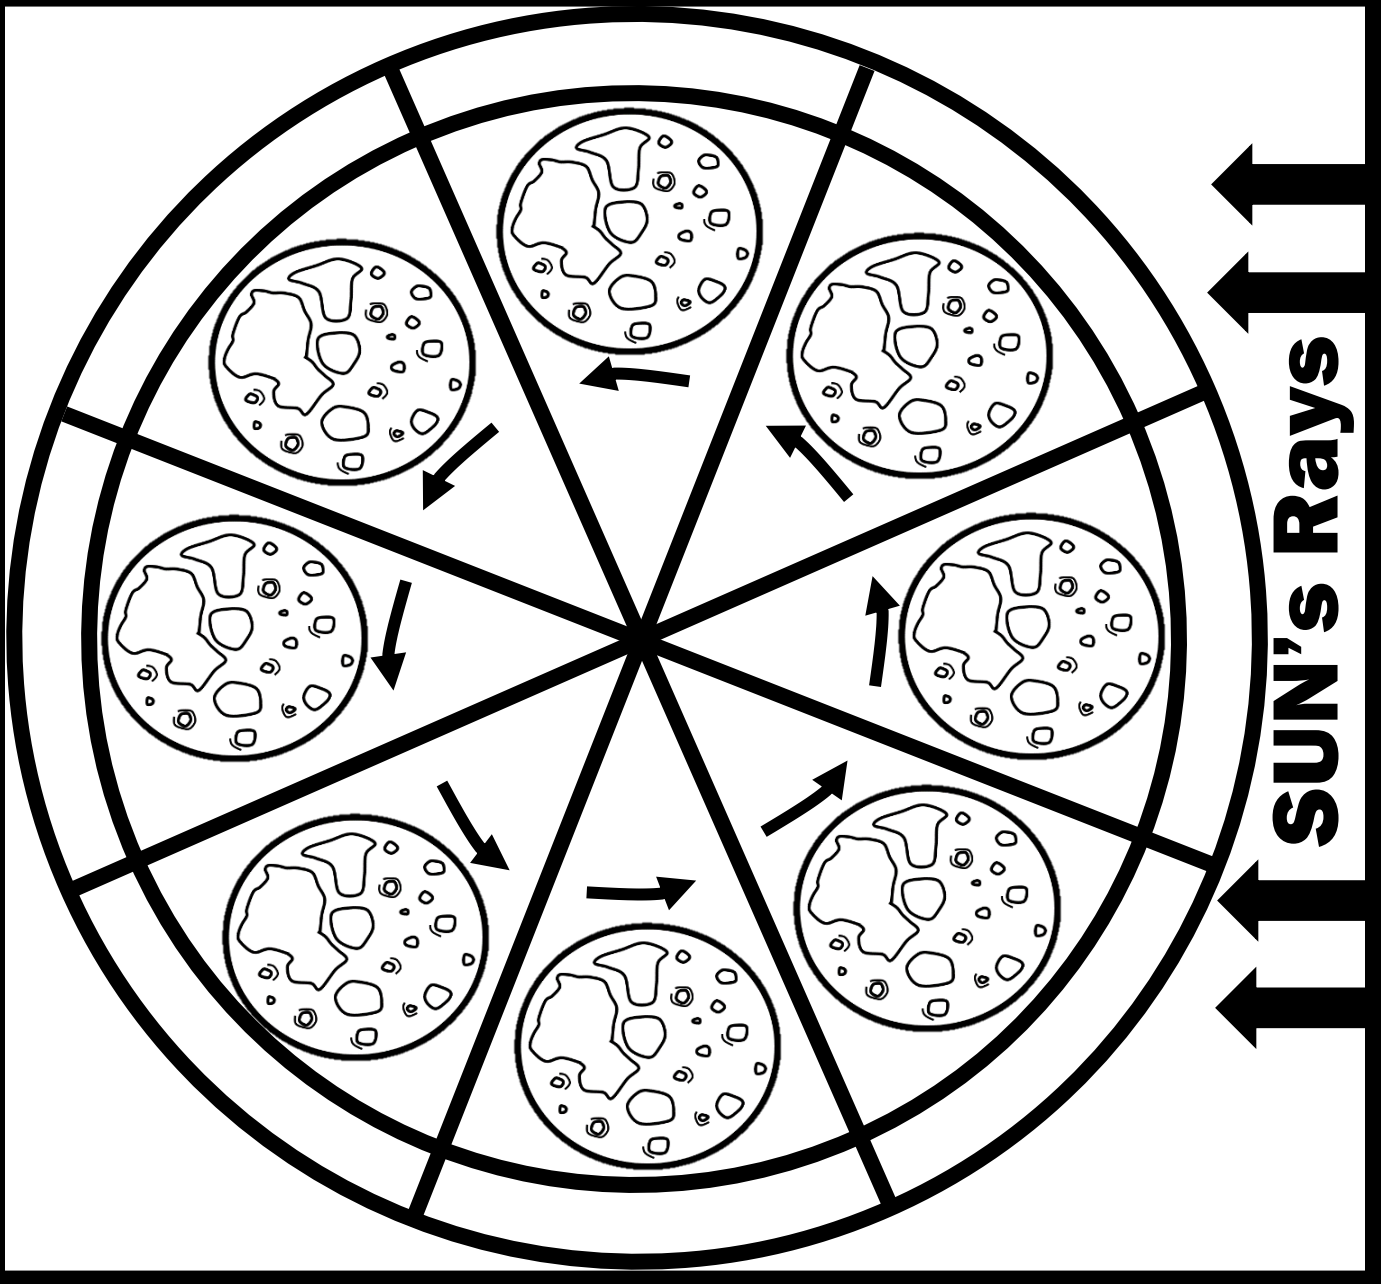

After you choose the bottom page you are using, cut it out along with the top portion of the foldable (located on page 9). Then use a paper fastener to combine the bottom and top portions of the foldable. See pictures below for clarification.
